

SANTHOSH KANNAN

+91 9074033475 | Idukki, Kerala, India | santhoshkannan.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience across the MERN stack, Django REST Framework, and applied machine learning, spanning production-style marketplace platforms, mobile booking systems, and multi-tier institutional workflow applications. Comfortable working across the stack — API design, relational and NoSQL databases, and cloud/Linux fundamentals — with a structured, data-driven approach to building and integrating ML models. Seeking to apply this versatility to software development, data analytics, or DevOps-focused roles.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Data & Machine Learning: Scikit-learn, Machine Learning Fundamentals, Data Analytics, Model Integration into Applications

Backend & APIs: Django, Django REST Framework, Node.js, Express.js, RESTful API Design, JWT Authentication, OAuth

Frontend: React.js, React Native, Next.js, HTML5, CSS3

Databases: PostgreSQL, MongoDB, MySQL, SQLite (3NF Design)

Cloud, DevOps & Tools: AWS, Linux Administration (Red Hat), Git, GitHub, CI/CD Fundamentals, Vercel

Core CS: Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

Code for all projects below: github.com/santhoshkannan-dev

NavaKrishi — AI-Powered Agriculture Marketplace — *React.js, Django REST Framework, PostgreSQL, Python, Scikit-learn*

- **Problem:** farmers and consumers lacked a direct, trustworthy online channel to buy and sell produce.
- **Engineered** a full-stack marketplace with role-based authentication and REST APIs via Django REST Framework; trained and integrated Scikit-learn models for crop prediction and personalized product recommendations.

NavaYatra — KSRTC Bus Booking Mobile App — *React Native, Django, PostgreSQL, JavaScript*

- **Problem:** KSRTC bus ticket booking lacked a simple, mobile-first search-and-book experience.
- **Developed** a cross-platform mobile app covering route search, seat selection, and ticket management, backed by RESTful Django APIs and optimized PostgreSQL queries for faster response times.

Excellence Grid — Marian Best Class Evaluation System — *Next.js 14, React, TypeScript, Django REST Framework, SQLite (3NF)*

- **Problem:** the college lacked a structured way to score, rank, and audit classes across academic, co-curricular, and extracurricular performance.
- **Architected** a multi-tier evaluation platform with a 7-stage approval workflow (submission → rep verification → teacher endorsement → evaluator scoring → automated indexing → IQAC review → leaderboard), using a Next.js/TypeScript frontend and a Django REST Framework backend with JWT and Google OAuth.
- **Implemented** full workflow audit-trail logging for transparency and institutional accountability across every approval stage.

EDUCATION

Master of Computer Applications (MCA) 2025 – 2027

Marian College Kuttikkanam Autonomous, Idukki, Kerala

Bachelor of Computer Applications (BCA) 2021 – 2024

Marian College Kuttikkanam Autonomous, Idukki, Kerala

CERTIFICATIONS

- Red Hat System Administration I (RH124) — Red Hat Academy (2025)
- NPTEL Introduction to Machine Learning — IIT (2024)
- Python for Data Science — NSDC (2024)
- Python Essentials 1 — Cisco (2024)
- Fundamentals of Networking and Cisco Devices — Packt / Coursera (2024)

ACHIEVEMENTS

- Active problem solver on LeetCode and HackerRank, strengthening algorithmic thinking and DSA fundamentals.
- Participated in CodeWars – Tekron 2.0, a competitive coding event by Newton School of Technology.
- Continuously upskilling in AWS, Linux administration, networking, and machine learning through self-study and hands-on projects.
